

OHBA Safety Pages: Hand Safety

Introduction:

Protecting your fingers and hands is important for your work and quality of life. Work-related hand injuries are one of the leading reasons workers end up in the emergency room and miss work. Damage to the nerves in your fingers and hands, loss of a finger, a skin burn, or allergic reaction, can negatively impact the quality of your work, your productivity – or worse – end your career and seriously detract from your quality of life. The cost of these types of injuries and illnesses to the construction industry is estimated in the hundreds of millions of dollars each year.

Main Message:

- Always stay alert and focused on keeping your hands safe – not just at the start of work or a task.
- Keep guards on machinery and power tools in place – Don't remove or reposition them. • Use tools and equipment designed for the work being performed and use them as instructed by your supervisor and/or the manufacturer.
- Don't put your hands or fingers near the moving parts of a power tool or equipment. Make sure machinery, equipment and power tools are completely off before you try replacing, cleaning or repairing parts – follow lock-out/ tag-out procedures.
- Identify safety features on tools and equipment before you use them, such as emergency off switches.
- Check tools and equipment to make sure they are in proper working order before beginning a task.
- Keep hands and fingers away from sharp edges (blades, protruding nails, etc.). Never cut toward the palm of your hand.
- Select hand tools that are ergonomic for your hand (the right size, lowest weight, and have features such as grips, anti-vibration handles, handle angles that allow you to work without your wrist bent.)
- Wear gloves that fit your hand and are right for the work being performed – not all gloves protect against all hazards.
- Do not wear rings, other jewelry or loose articles of clothing that could get caught on a moving object.

The information we provide is not intended to include all possible safety measures and controls. In addition, the safety information we provide does not relieve the Members of its own duties and obligations with regard to safety concerns, nor does Oregon Home Builders Association guarantee to the Members or others that the Member's property, job sites and/or operations are safe, healthful, or in compliance with applicable laws, regulations or standards. The Members remain responsible for their own operations, safety practices and procedures and should consult with legal counsel as they deem appropriate.

SAFETY PAGE MEETING GUIDE

Topic: Hand Safety

Employer: _____ Project: _____

Date: _____ Time: _____ Shift: _____

Number in crew: _____ Number attending: _____

Safety or Health issues discussed. Include recent accident investigations and hazards involving tools, equipment, the work environment, work practices and any Safety or Health recommendations:

Follow up on recommendations from last safety meeting:

Record of those attending:
